

ALG Optional Project #2 - Quarter 3

History and Artistic Representation of a Scientific Principle

Project Objectives: In this project, you will use Language Arts, History, Science, and your creativity to represent and explain a scientific principle of your choice. Your final product must have these minimum requirements:

- 1.) A brief history of the scientific principle, what it means, how it is used, why you chose this, etc. (written or typed with citations)
- 2.) 2-D or 3-D representations of this principle.
- 3.) Historical significance. (how did it affect or change our lives, with citations)
- 4.) Visually appealing final product.

You may work independently or in groups. You will be provided with support and some guidance, but for the most part you will be given creative liberty! Have fun and learn!!

Due March, 2015

This project may be worked on during Tiger Time or at home.

This is an optional ALG project, regular academic work must be completed first and should be your top priority.

For support; please talk with Ms. Beasley-Bunnell and or Ms. Kuhl.
